Web game

Best Fisherman 3D

Game features

In the gameplay of multiple people fishing together online at the same time, you can see the actions of other players fishing and fighting fish. This is actually simulating the situation of a row of fishing friends standing together fishing and chatting on a real fishing ground.

The complete friend-making and online real-time chat system allows players to meet new friends in the game, or communicate with non-friends.

It covers all currently known fishing methods, including floating fishing with a hand rod, floating fishing with a swinging rod, bottom fishing with a swinging rod, front fishing, Awa, bait cage, lures and flies, etc., with realistic effects in the game.

Paper doll system : Players can purchase a variety of clothes and decorations to create their own personal style for their game characters.

A fully 3D fish fighting system. When fighting fish, players can see the swimming posture of the fish in the water, and cooperate with the player to operate the reel to determine victory or defeat.

Y O U T U B E

◆ PC web game

This game is a 3D fishing game from Flash Base. It uses a web browser as the game platform and emphasizes the gameplay of simulating the real environment and current conditions of the fishing grounds. The designer went deep into the group of fishing friends to explore the state of mind of the fishermen and designed the game accordingly. The content is deeply loved and obsessed with by the fishing community. Some people have been playing it for three years and have not left until now.

HOME

BestAngler-The Fighting Pool

🔹 This is a fishing game that simulates pool fishing. Players will challenge the pool owner's bonus fish with their own fishing skills and receive fish rewards. The battle pool gameplay has been popular in Taiwan for many years, and this time it appears in the form of a mobile game for the first time. It mainly targets the market of fisherman players, and allows fishermen to use their mobile phones to fish at home and earn game currency rewards when they are not out fishing. The game itself prefers a highly realistic fishing gameplay, so it does not focus on ordinary game players. This is also our original intention in developing this game. We are targeting the market of fishermen.

🔹 The development of the program part will begin in September 2022, and it will be ready to be put on the Google play and iOS App stores by May 2023. It is still only the first phase of development, so the items listed this time are undergoing public testing. The second phase of development will improve the unfinished parts and modify them based on player feedback.
